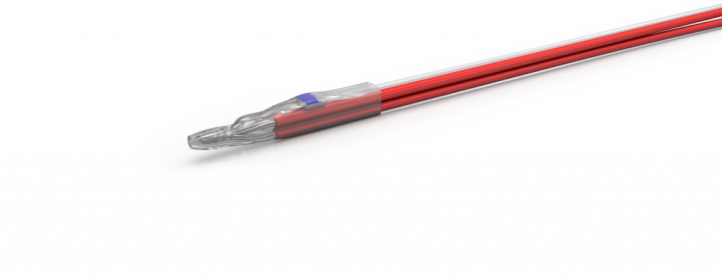
10EP-10 - TEMPERATURE PROBE WITH DOUBLE INSULATION SENSOR

COD. PROD. 10EP-10

DESCRIPTION

Fast response "minimal" probes just composed by an insulated sensor with a double heatshrink tube and a cable. Temperature probes for temperature control of the winding of electrical machines. This probe is customizable on customers' requirements.

TECHICAL DATA


PRODUCT CODE	10EP-10
TEMPERATURE RANGE	(0+260)°C
SENSOR	NTC-PTC-PT100-PT1000-Thermocouple (more sensors are available on request)
CABLE MATERIAL	TEFLON (MFA)
TERMINALS	Tinned, pins, connectors (other terminals are available on request)
