

The new TH387 5-poles connector
The most compact plug&socket
with screw terminal blocks (IP68)

LED luminaires demand for smaller solutions

Safe time: use pluggable connectors
in tight space

TECHNOLOGY & INNOVATION

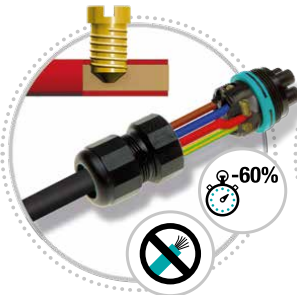

Extreme Quality

Designed to satisfy all customer needs (IP68)

Maximum reliability

Twin-injected gasket with perfect mechanical and chemical adhesion ensures error-proof installations and high resistance against water and dusts.

Rapid wiring

Fast connections with the insulation piercing clip terminal blocks. No cable preparation required for timesaving installation (only available in 2-3-4 poles connectors).

Intuitive connection

Innovative design, few components and intuitive wiring system ensure quick installations.

Quality installations

Robust connectors and quality materials (PA6/PA66 GF UL94 V0/V2) with excellent resistance to aging in harsh conditions (hot-cold, oils, vapors, etc.).

High safety standards

Usage of halogen-free products aimed at protecting the environment and by applications with enhanced fire safety needs and fire damage prevention needs.

Versatile solutions

Panel-mounted connectors ensure rapid connection and disconnection to substitute the cable gland.

Dimensions that make a difference

The new connector TH387 up to 5-poles with screw contacts is capable to meet the growing demand for connection in tight spaces. Helpful in lighting installations, agriculture, motors and pumps, transportation, CCTV, industrial automation.
