

ELECTRONIC ILLUMINATED PUSH-BUTTON SWITCH WITH TIMER

Led-illuminated momentary switch with embedded microprocessor circuit board and power supply

An illuminated mechanic push button is attached to a PCB managing the refrigerator's fast freezing.

When the button is pushed, it switches on the super cooling, and automatically disconnecting it after 72 hours of service.

APPLICATION	Low-power switching control for small and large appliances
POWER SUPPLY	220-240 VAC
FREQUENCY	50-60Hz
LOAD TYPE	0,95A, 220-240 VAC
STAND-BY POWER	< 0,15W
TEMPERATURE	T65
SWITCHES	1 TRIAC
