

Piris 2016

Representation and distribution of electric,
mechanic and electronic components

Founded in 1980, PIRIS is a company with experience in the distribution of electrical, mechanical and electronic components.

The orientation of the company to the quality of service, availability of stocks, speed of delivery, and the increasingly wide range of products, are turning PIRIS a provider of reference.

Iconographic Legend

Catering Equipment

Medical

Hydromassage

Home Appliances

Industrial Machinery

Facilities Maintenance

Industrial Refrigeration

Air Conditioning

Cable harnesses

Lighting

Heating

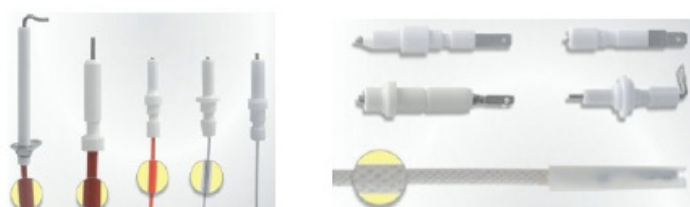

Heat / Cold Thermostats

Wide range of capillary thermostats for domestic and industrial applications, notably the cooling thermostats and thermostats for washing and cooking.

Spark Plugs

Manufacturing and commercialization of spark plugs.

Ceramic terminal blocks / Emergency switches / Plastic Enclosures

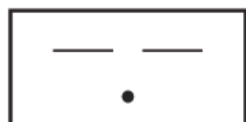

Ceramic terminal blocks, emergency switches, wall-mounting enclosures for industrial environments.

Electrical wires

Approved electrical wires: silicone, rubber, PVC, and photovoltaic systems.

euro-block

PCB Terminal Blocks

Terminal Blocks for printed circuit boards.
1 deck, 2 decks and removable connectors.
Possibility to include screen printing.

IEC Connectors/ Signal Lights / Switches / Pressure Switches

Electromechanical components for all kind of appliances and general industry.

Main components: switches, signal lights, small pressure switches.

Timers

Timers for household appliance's market.
Adaptable to any equipment that requires a timed switch.

Hood filters

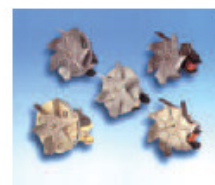

Filters for domestic and industrial hoods.
Available with stainless steel frames and finishes.

Motors

Motors and electric fans.
Axial and tangential models are available.

Energy meters / Transformers

Energy meters for industry & solid core and split core transformers.

Connexion elements

Connection components: terminal blocks, terminal boxes, cable clamps and connectors.

Ignition elements for gas

Electronic ignition components for gas: micro-switches and electric lighters for cookers, ovens, boilers ...

Jacob

Cable Glands

Cable Glands IP68.

Cable cords with plug

Cable cords with plug for appliances and industrial machinery.

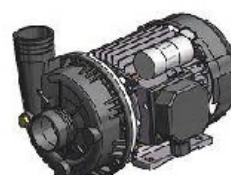

Connection elements

Connection components: terminal blocks, terminal boxes, cable clamps, fastons, flanges, connectors type NAC.

Motors and pumps

Pumps for industrial washing and convection electric motors for industrial ovens.

Electronic control systems

Electrical and electronic products: timers and control systems (hardware and software).

Hinges

Hinges for home appliances.

Electrovalves

Direct acting electrovalves for home appliances.

Switches/ Micro switches

Micro switches and electrical switches.
Multiple combination of body and buttons.

LED Lamps

Led lamps for domestic and industrial use.
Ideal for industrial buildings.
We do lighting projects.

Piris 
COMPONENTS

SEDES

GROUP
HEATING ELEMENTS

Heating elements

Heating elements for industrial sector and consumer goods.

Sensata
Technologies

Relays / KLIXON Thermostats / Thermal protectors

Elements for protection and control of domestic and industrial equipment:
thermal protectors and KLIXON thermostats

SISME

Motors

Asynchronous and brushless electric motors for home appliances, rotors and stators for refrigeration compressors, motors for ventilation and air conditioning.

Motors for fan-coils are available.

LED Signal Lights

LED signal lights for all kind of appliances and general industry applications.

Cable cords with plug

Cable cords with plug for appliances and industrial machinery.

Waterproof connection elements

Connectors and terminal boxes with a high degree of protection IP68 (continuous immersion in water).

Electrovalves / Water softeners and Airbreaks

Electromechanical components for applications in washing machines and dishwashers.
