

LD series (only with LED)

LD/06

LED light indicator.

The light indicator is inserted in the hole from the front of the panel.

Screw locking light indicator.

The colour of the led's support (situated around the led) is the same as the emitted light.

The light indicator can be used with AC and DC (if DC the light indicator has to be polarized).

There is the opportunity to request the screw assembled or apart (not assembled on the plastic case).
